Applicant's arguments with respect to claims 1-7 have been considered but are deemed to be most in view of the new grounds of rejection.

The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 C.F.R. § 1.81.

The drawings are objected to under 37 C.F.R. § 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the claimed subject matter must be shown or the feature cancelled from the claim. No new matter should be entered.

With respect to Applicant comments concerning the admission of required drawings, Applicant is advised that proposed drawings must be submitted for consideration by the Examiner **before** a notice of allowability is issued.

Claims 1-7 are rejected under 35 U.S.C. § 101 because the claimed invention os directed to non-statutory subject matter. With respect to claims 1-7, Applicant is advised that the claims as now written simply recite a photographic film having defined non-statutory subject matter, i.e. printed subject matter.

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

1

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claims 1-7 are rejected under 35 U.S.C. § 103 as being unpatentable over Spector('832), Spector('224) and Kirkendall. With respect to claims 1-7, Spector('832), Spector('224) and Kirkendall each disclose all aspects of said claims with the exception of specifically stating that such a pre-exposed border could be utilized in an instant type film unit. Spector('832), however, does disclose that the film used could be of the instant type (see column 3, lines 1-5). Given that Spector('832), Spector('224), and Kirkendall each disclose devices of a similar form and function, it would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize common knowledge in the art as evidenced by Spector('832), in conjunction with Spector's('832), Spector's('224) and Kirkendall's teaching of such borders in non-instant type film cartridges, for the purposes of obtaining an artistic film frame design in an instant film type camera, the like of which is common in the art.
